## 3<sup>rd</sup> Mladen Vučetić Memorial Lecture

Rijeka, 9 June 2026, 2:00 PM CEST

Faculty of Civil Engineering, University of Rijeka

Radmile Matejčić 3, Lecture room: G-003

Online participation [link](#), passcode 09062026

In honor of Professor Mladen Vučetić, the Faculty of Civil Engineering, University of Rijeka and the Croatian Geotechnical Society are organizing the 3rd Mladen Vučetić Memorial Lecture.

This lecture is dedicated to celebrating Professor Vučetić's outstanding scientific contributions and his lasting impact on the geotechnical community. It also serves as a tribute to his thoughtful, dedicated, and inspiring approach to research and education, through which he achieved remarkable success and supported the development of many young geotechnical engineers. The event aims to encourage students and colleagues to value scientific work and actively engage in research, following the clarity and excellence that characterized Professor Vučetić's career.

Professor Mladen Vučetić began his academic career in Zagreb, continued his research in Norway and the United States, and spent the majority of his professional life at the prestigious University of California, Los Angeles (UCLA). During his career, he led numerous internationally significant research projects and collaborated with many scientists worldwide. His work also provided valuable opportunities for researchers from Croatia, many of whom joined his projects in the United States.

The lecturer of the 3rd Mladen Vučetić Memorial Lecture is

**Professor Giuseppe Lanzo, Sapienza University of Rome**

who will present

**“Dynamic Characterization of Earth Dams under Seismic Loading Conditions:  
Insights from Italian Case Studies”**

We warmly invite you to join us in honoring the memory and scientific legacy of Professor Mladen Vučetić.

For the Faculty of Civil Engineering in Rijeka  
**Assoc. Prof. Mladen Bulić, Dean**

For the Croatian Geotechnical Society  
**Assoc. Prof. Goran Vlastelica, President**
